SAFETY & RELIABILITY

Safety and Reliability are two core pillars of our commitment to our customers. As our base standard, all **Driverge** vehicles must meet or exceed **ADA, FMVSS, NHTSA** and **OEM Upfitter** requirements. Added safety and quality measures include:

- Seat and seat sequence pull-testing in partnership with all seating manufacturers
- Independent Lab Crash Testing and Certification and Documentation
- CARB and state compliant for all emissions requirements

VEHICLE HIGHLIGHTS

- **Transporters** – for up to 15 passengers in hundreds of configurations and designs based on customer need.
- **Impression Series Transporters** – features upgraded seating, lighting and technology options in a limousine style setting
- **Bus Doors Entry** – Walk-in bus door entry saving money on upfit and fuel economy over traditional, larger bus options.
- **Non-Emergency Medical Transport (NEMT)** – for wheelchair and ambulatory passengers equipped with side or rear lift installation.
- **Minivan Wheelchair Accessible Vehicles (WAV)** – flexible choices for Taxi, Rideshare, and wheelchair passengers, including options with Flex Flat Ramp system.
- **Prisoner Transporters** – High security and medium security options, based on customer needs and requirements.
- **Crew / Work Vans and Equipment Movers** – niche solutions to meet growing customer demands, including Solar-powered accessory power stations
- **Innovation & Specialty Applications** – custom-designed transport products based on customer needs.
