

Ideas made to move healthcare

Mobile Medical Transporters

by Driverge Vehicle Innovations

YOUR COMMUNITY OUTREACH SOLUTION.

Driverge Vehicle Innovations is one of the nation's largest maker of wheelchair accessible vans. And our expertise goes beyond accessibility. We also design and build mobile healthcare vans.

So, no matter your outreach needs... COVID 19 testing/vaccinating, mobile clinics, bloodmobiles, eye and dental clinics... the road to a healthier community starts with Driverge.

If you can spec it, we can build it.

You expect engineered solutions. We deliver. That's because we leverage our long history as an industry leader in adaptive technology with our membership in the Ford Ship-Through Upfitting/ Baitment, Mercedes-Benz MasterSolutions and Ram Commercial Q-Pro programs to custom tailor solutions catered to our clients' specific needs.

Custom Design and Build

From stock items to custom-made, we design and equip your vans to meet all medical, diagnostic, and administrative needs.

Lifts and Ramps

If you need ramps or lifts for equipment or patient care, put our 20+ years of experience building accessible vehicles to work for you.

Air Filtration, Refrigeration and Sanitization Station

Sinks with running water, air purification systems and disinfectant dispensers promote a healthier environment for workers and patients.

Driver Guard

Our partitions can be easily installed to headrest posts and require no vehicle modifications or hardware.

Seating and Bedding

We configure seating and/or bedding to maximize space and efficient medical caregiving.

Pharmaceutical Storage

We install cabinetry or rack and bin storage systems to suite your needs.
