Medium Security Prisoner Transporter

Separate Guard/Prisoner Areas

Two rear prisoner areas for greater flexibility and security. Holds up to eight prisoners, four guards and driver, or 11 prisoners.

Barred Windows and Spacious Transport Areas

Inserts reduce space, cut off ventilation and can cause claustrophobia. Our transporters are designed to provide safe and secure confinement that can reduce anxiety and motion sickness.

Easy Maintenance Seating and Flooring

High-quality injection molded, ABS plastic seats with lap belts and Altro non-skid, easy-to-clean floor help make Driverge transporters easier to clean and maintain.

Retractable Steps For Easy On/Off

Loading and unloading passengers is faster and easier with retractable steps that are out of the way when parking or backing into tight areas.

Emergency Cabin Exit

Driver and front passenger can safely exit the vehicle through an emergency door behind the seats.

Optional Wheelchair Accessibility

Need wheelchair accessibility? Put our 20+ years of experience building accessible vehicles to work for you.

Optional 2-Door Security

For optimum safety and security, our 2-door entry system is designed for maximum staff protection and safe transport.
